Introduction

The Uniform Appraisal Dataset (UAD) is a standardized industry dataset for appraisal information that is transmitted electronically through the Uniform Collateral Data Portal® (UCDP®). At the direction of the Federal Housing Finance Agency (FHFA), Fannie Mae and Freddie Mac (the government-sponsored enterprises or GSEs) jointly developed the first UAD in 2010 using the Mortgage Industry Standards Maintenance Organization (MISMO®) Reference Model 2.6, providing consistent data standards for the loans the GSEs purchase.

The dataset is being updated to reflect changes to the appraisal industry, address future appraisal needs, and facilitate ongoing digitization in the appraisal process and the mortgage industry.

In the legacy UAD, standardized data was the key to evaluating risk at a macro level. The new dataset will take this advancement even further by:

- Creating consistent enumerated fields.
- Keeping the related data together in each section for an easy-to-read report.
- Reducing subjectivity to enhance impartiality through discrete data versus free-form text.
- Conditionality driving what sections appear on the final output.
- Eliminating the confusion of having two scopes of work (update and completion) on the same form.

In addition, appraisal data is currently submitted to the GSEs using the MISMO Reference Model 2.6, which is outdated and no longer supported by MISMO. As part of this update, the UAD will conform to the latest MISMO Reference Model (3.6).

The primary purpose of Appendix F-3: Completion Report Reference Guide is to provide guidance on how to enter information and how the data will be displayed on the Completion Report.

Overview

The legacy form 1004D/442 was used for Appraisal Update and/or Completion. In the UAD redesign, the Completion Report and Restricted Appraisal Update Report are separate reports. This Reference Guide only addresses the Completion Report.

Legacy Form Name	Fannie Mae Form	Freddie Mac Form
Appraisal Update and/or Completion Report	1004D	442

Completion Report Section Organization

The Completion Report is a dynamic report with sections (black tabs) that vary based on information in the report. This table shows the sections of the Completion Report and when they display. For more information about a section, reference the appropriate chapter in this document.

Section #	Section Name (Black Tab)	Always Displays	When Section Displays
01	Subject Property	√	
02	Original Appraisal	√	
03	Itemized List of Repairs		When the original appraisal report lists required repairs
04	New Observed Items for Repair		When additional repairs were observed during the completion inspection
05	Completion Status		When <i>Original Market Value Condition (02.003)</i> includes Subject to Completion Per Plans
06	Completion Report Commentary		When applicable
07	Completion Report Exhibits		When applicable
08	Assignment Information	√	
09	Certifications and Intended Use / User	√	

Table Column Headings

In this document, tables are used to define the fields in the Completion Report. Column headings are as follows:

- **Report Field ID:** A red number identifying the specific location of the field on the Completion Report.
- **Report Label:** The name of the field as shown on the Completion Report.
- **When to Include:** The conditionality for when the information is required, expressed in business terms.
 - Examples: Always required, Required for FHA, If applicable.
 - Note: When information is required is not always the same as when it displays.
- **Allowable Answers / Format**
 - Examples: Yes | No, Free-form, Number, Choose allowable answer(s) from a list or table.
- **Definition / Additional Guidance:** The definition in business terms, including notes and examples, a list of allowable answers, and additional guidance.
 - Note: Allowable answers with complex definitions are in a separate table.

Document Conventions

The following fonts and colors are used in this document:

- Section names (black tabs) and subsections (gray bars, tables, or groupings of related information) are **bold**.
- **Report Field ID**: A red number identifies the specific location of the field on the Completion Report.
 - The number starts with the section number, as shown in [Completion Report Section Organization](#). For example, fields displaying in the **Completion Status** section start with **05**.
 - **Not on Report** indicates that the information is included in the data but does not display.
 - Specific **Report Field IDs** for photos and images are not indicated in the Reference Guide. Refer to the iGuide or UAD Spec for more information.
- Green rows in tables in the Reference Guide represent information that is applicable only to FHA, VA, or USDA appraisals.
- *Field Names* in the Reference Guide use business terminology and are in italics.
 - *Field Names* provide additional clarity to the Report Label, and express conditionality (“When to include”) in business terms.
 - *Field Names* in the Reference Guide are similar to, but not the same as, the MISMO Data Point Name in the iGuide and UAD Spec.

Key Concepts

Intended Use of the Completion Report

The intended use of the Completion Report is to confirm whether the conditions stated in the original appraisal report have been met. The Completion Report does not provide an opinion of value.

Sections of the Completion Report

The Completion Report can be used for:

- Items the appraiser identifies as needing repair.
- Completion Status (new construction or incomplete construction).

Repair Items

If there are repair items, they can display in one of two sections of the Completion Report:

- The **Itemized List of Repairs** section shows Defects, Damages, or Deficiencies from the original appraisal that required repair.
- The **New Observed Items for Repair** section provides space to report items that were observed in a subsequent inspection.

If there are no repair items identified in the original appraisal or upon a subsequent inspection, neither section displays, and the appraiser completes the **Completion Status** section.

Completion Status

The **Completion Status** section displays when *Original Market Value Condition* (02.003) includes Subject to Completion Per Plans, such as for new construction or incomplete construction.

Commentary and Free-form Comments

Section commentary must be entered in the applicable section:

- *Completion Report Commentary* (06.001)
- *Assignment Information and Scope of Work Commentary* (08.043)

In addition, there are tables that include space for comments or descriptions. Concise comments should be entered in the applicable section as opposed to typing in “see below.”

Photos and Images

With the exception of the following, all photos and images display in **Completion Report Exhibits**.

- A photo displays at the top of the **Subject Property** section.
- Legal Description image, if applicable, displays in the **Legal Description** subsection of the **Subject Property** section (**01.003**).

Identifying and Describing Photos and Images

The appraiser must identify each photo or image from the list in the table below.

- For most photos or images, there is a predefined caption or gray bar that automatically displays.
- Depending on the photo or image,
 - An additional caption must be provided, *or*
 - An additional caption may be provided to further identify the photo or image, *or*
 - There is no additional caption.
- The table below indicates when photos are required per the Reference Guide.
 - Examples:
 - A photo (“Property Photo”) must be displayed at the top of the **Subject Property** section.
 - Photos are required for all repair items.
 - Reference published guidelines by the GSEs, government agencies, or other identified secondary market participants for specific guidance as to when a photo or image is required.

Notes:

- The same photo can be identified and displayed in more than one section.
- Reference the iGuide and UAD Spec for details about how photos are handled in the UAD dataset.
 - Specific **Report Field IDs** for photos and images are not indicated in the Reference Guide. Refer to the iGuide or UAD Spec for more information.

Section #	Section Name (Black Tab)	Photo or Image (Predefined Caption or Gray Bar)	Is there an Additional Caption (Free-form Text)?	Is the Photo or Image Required?	Additional Guidance
01	Subject Property			Yes	Photo at the top of the section (identified as Property Photo)
		Legal Description	May be provided to further identify the image	If <i>Legal Description 01.003</i> is not provided	See 01.003
07	Completion Report Exhibits	Itemized List of Repairs – <i>Feature</i> Example: Roof	May be provided to further identify the photo or image	Yes	The photo must be associated with the specific repair item. See 03.001 .
		New Observed Items for Repair – <i>Feature</i> Example: Roof	May be provided to further identify the photo or image	Yes	The photo must be associated with the specific repair item. See 04.001 .
		Completed Construction	May be provided to further identify the photo or image	If <i>Construction Complete 05.001</i> is Yes	See 05.001
		Inconsistent Item – <i>Feature</i> Example: Flooring	May be provided to further identify the photo or image	If <i>Construction Consistent with Original Plans and Specs 05.002</i> is No	The photo must be associated with the specific inconsistent item. See 05.003 .
		Dwelling Front	May be provided to further identify the photo or image	If required by client or scope of work	
		Dwelling Rear	May be provided to further identify the photo or image	If required by client or scope of work	

Section #	Section Name (Black Tab)	Photo or Image (Predefined Caption or Gray Bar)	Is there an Additional Caption (Free-form Text)?	Is the Photo or Image Required?	Additional Guidance
07	Completion Report Exhibits (Continued)	HUD Data Plate	May be provided to further identify the photo or image	If not provided in the original appraisal	Provide an image of the verification source if the HUD Data Plate is not present.
		HUD Certification Label	May be provided to further identify the photo or image	If not provided in the original appraisal	Provide an image of the verification source if the HUD Certification Label is not present.
		Manufactured Home Certification	May be provided to further identify the photo or image	If not provided in the original appraisal	
		Completion Report Exhibits	Required for each photo or image		Photos or images related to the Completion Report that are not specified above.

Best Practices

When there are multiple allowable answers, select the answer that is most applicable. Do not select Other (Describe) and type in abbreviations or words with similar meaning to the allowable answer.

The **Certifications and Intended Use / User** section provides space for additional appraiser or supervisory appraiser certifications. The appraiser must not enter language that is contrary to the predefined certifications (09.018 and 09.024).

Header and Footer

The header and footer display on each page. They provide navigation and reference notations including report title, page numbers, and, if applicable, Reference IDs used by various parties to the Completion Report. The footer contains information input by the appraiser; those fields are addressed in this chapter.

05 Completion Status

The **Completion Status** section displays when *Original Market Value Condition (02.003)* includes Subject to Completion Per Plans. Depending on the answers provided, the contents of this section vary.

- Is construction complete?
 - Yes ([Completion Status Example 1](#))
 - No ([Completion Status Example 2](#))
- Was construction completed in a manner consistent with the original plans and specifications?
 - If yes, no further information is required, as illustrated in [Completion Status Example 1](#).
 - If no, provide a description of each feature that is not consistent with the original plans and specifications, as illustrated in [Completion Status Example 3](#).
