Introduction

Automated income assessment with LPA using tax data related to the borrower's **self-employed** income (formerly "AIM for Self-Employed") is a capability within LPA that leverages access to optical character recognition (OCR) technology from third-party service providers (service provider) or tax transcripts, via a service provider, to help enable the automation of certain income calculations for self-employed borrowers; this allows LPA to determine whether you are eligible for relief from enforcement of certain representations and warranties (referred to as "rep and warranty") related to the borrower's self-employed income using tax data.

How does it work?

You have options based on your processes and service provider,

To make it easier to,

- Grow your business: Simpler underwriting helps you take on loans with self-employed income you might have had to commit greater time and resources to previously.
- Close loans faster: Automation speeds up income assessment and creates efficiency.
- Get immediate representation and warranty relief: Related to the eligible self-employed income.

To participate in using this capability, you must first have an agreement with a third-party service provider designated by Freddie Mac. Refer to the [AIM webpage](#) for getting started with a service provider.

NOTE: Freddie Mac does not endorse, or make any representations or warranties regarding, any service provider. Each lender is solely responsible for the decision of whether to engage a given provider, and on what terms, and for ensuring that the providers it engages have in place and maintain controls, processes, and procedures that satisfy the lender's business, operational risk, legal and regulatory requirements.

Eligibility Requirements

Complete signed federal individual and S-Corporation (Form 1120S) income tax returns, including the Schedule K-1(s), Form 1125-E and W-2(s) if applicable, for the most recent two years.
	Check the tax returns uploaded to the service provider for the following to confirm:		
		IRS Filing: Are they the borrower’s most recent return(s) filed with the IRS? We encourage you to always confirm with the borrower that the tax return(s) or tax transcripts obtained by the service provider are the most recent filed with the IRS. In addition, the individual tax return year most recently filed must correspond to the business tax return year most recently filed with the IRS for all businesses (e.g., when the most recently filed individual tax return year is 2024, the most recently filed business tax return year must also be 2024). Refer to the Age of Tax Data Requirements .	
		History of receipt: If the borrower’s business has been in existence, or the borrower has owned the business <u>for less than five years</u> , does the borrower’s federal income tax returns or tax transcripts reflect at least <u>two years of receipt of income</u> and/or losses from the business?	
		Same business type: Is the income and/or loss reflected in the tax returns or tax transcripts reported for the same business on the same tax form structure for the most recent two years ? For example, the business cannot be reported as a sole proprietorship and then converted to a partnership.	
		Business tax returns: Income reported on the business tax returns but not on the personal tax returns must not be considered as stable monthly income.	
	Note: For a sole proprietorship you must document on the loan application the number of years the business has been in existence. The length of time must not contradict the borrower’s federal individual income tax return(s) or tax transcripts, and any other documentation or information received.

Income Representation and Warranty Relief

Loan Product Advisor using tax returns obtained from the borrower assesses the calculation of income and/or losses on an **individual borrower-level** and **individual business-level** basis from the eligible self-employed income based on data from the federal income tax returns and the Income Calculation Report you upload to the service provider.

Loan Product Advisor using tax transcripts obtained from a service provider assesses the calculation of income and/or losses on an **individual borrower-level** and **individual business-level** basis from the eligible self-employed income reported on IRS Form Schedule C based data from the federal income tax transcripts.

On a loan-level basis, LPA returns one of the following income rep and warranty results on the Feedback Certificate using an "Income R&W Relief" indicator of: Eligible, Partial, Not Eligible, or Unavailable in the **Assessment Summary** section of the Loan Product Advisor Feedback Certificate. The Feedback Certificate also provides additional messages associated with the income rep and warranty relief result in the **Employment and Income Messages** section of the Loan Product Advisor Feedback Certificate. Review the messages and reconcile them against the information in the Income Calculation Report, Form 91 Income Calculations or similar alternative form. Keep in mind, after you review the messages and determine what, if any action is needed, you may choose to resubmit the loan.

To obtain relief, the data on the last complete Loan Product Advisor Feedback Certificate must be consistent with the data delivered to Freddie Mac.

Income R&W Relief Indicator  UNAVAILABLE Unable to Assess for Income Representation and Warranty Relief	You are not eligible for relief from enforcement of representations and warranties related to the borrower's income. LPA was unable to assess the borrower's income. This could be due to missing or incomplete information from the service provider or a system being down.	The income must be verified and documented as required by the Guide.

Data Representation and Warranty Relief Using Tax Returns

In addition to income representation and warranty relief, LPA also determines eligibility for tax return data representation and warranty relief. Refer to the [How it Works](#) diagram of options.

When using tax returns uploaded to a service provider, data representation and warranty relief may be available **when the tax transcript is requested via a service provider**. If a tax transcript is provided by the IRS, LPA will perform a comparison of data from the borrower's uploaded tax return(s) to the data from the tax transcript, assess for data representation and warranty relief eligibility, and return related messages on the Feedback Certificate. This capability will help with automating the manual process further up in the origination process.

Note: Eligibility for each type of representation and warranty relief is determined separately.

The following chart provides the **tax return data** representation and warranty relief results.

**If the “Not Eligible” is due to inconsistencies between the tax transcript returned by the IRS via the service provider and the tax return(s) uploaded to the service provider, you must resolve the discrepancy. If you find discrepancies, you must update the information in LPA and/or the Income Calculation report and resubmit the data, as necessary.

Note: You must maintain in the loan file the tax transcript received from the IRS via the service provider.

Data Representation and Warranty Relief Using Tax Transcripts through a Service Provider Direct Connection to the IRS

In addition to income representation and warranty relief, LPA also determines eligibility for tax transcript data representation and warranty relief. Refer to the [How it Works](#) diagram of options. Automated income assessment with LPA using tax data includes the ability to request a tax transcript from the IRS through a service provider that has a **direct connection to the IRS**. Once you receive the tax transcript data, submit the mortgage to LPA with the report ID. LPA assesses the tax transcript data for income reported on IRS form Schedule C. If LPA is able to assess the income, you may be eligible for relief of representations and warranties related to the accuracy and integrity of the tax transcript data.

Halcyon is currently the only service provider supporting this capability.

Getting Started

The next several sub-sections provide helpful tips for originating loans using tax data.

Steps for Originating Loans: Using Tax Returns Obtained from the Borrower

Operational, Loan Origination System (LOS), and service provider system impacts must be taken into consideration before implementing this capability. Once you are ready to begin using this service, follow and complete the steps outlined below. Based on your organization's business processes, the order in which you complete the steps may vary.

Using tax returns obtained from the borrower process steps

*If using LoanLogics as your service provider you must select the "Freddie Mac Form 91" file format.

Step 1: Order the Income Calculation Report from the Service Provider

As part of your process for gathering loan application data and authorizations, also obtain the borrower's authorization to share their tax returns and other relevant income information with the service provider and Freddie Mac. After you have obtained the borrower's authorization, upload the required tax documents and order the service provider's Income Calculation Report.

Step 2: Service Provider Returns the Income Calculation Report

The service provider completes the report request and returns the Income Calculation Report to you. After you receive the report, capture the unique identifier (Report ID). The report ID issued by the service provider will apply to a maximum of one IRS Form 1040 for each applicable calendar year, for up to two years, with no more than two borrowers on the same 1040 when filed jointly.

Importance of the Report ID (Reference Number)

The service provider assigns a unique Report ID to the Income Calculation Report. This number is associated with an application ID at the service provider. Identifying and using the correctly formatted report ID is critical for LPA to access the Income Calculation Report. The following are items to keep in mind with regards to the report ID:

1. The report ID is located in a field in the report provided by the service provider.
2. If there are multiple versions of the report, there is still only one report ID. The report ID plus the applicable date and time makes each report version unique.
3. Based on the report ID provided to Loan Product Advisor, LPA will receive the latest version of the report that you send back to or update with the service provider.
4. If you did not make any changes to the report, LPA will receive the original version generated by the service provider.
5. If you don't want LPA to use the report provided by the service provider, omit the report ID from your LPA request.
6. Ensure you are requesting the correct report when submitting the loan to LPA.
7. The original report ID must be used with all subsequent submissions to the service provider to update information (if applicable) and with all loan data submissions to LPA.

Step 3: Reconcile the Income Calculation Report

Next, review the Income Calculation Report to determine if any adjustment to the income must be made based on the information in the mortgage file and, if so, update the Income Calculation Report accordingly.

For example:

1. Are the income calculations acceptable or do manual changes need to be made to the report?
2. Is there non-continuing income, or income that should be excluded (e.g., the business is no longer in operation)?
3. Are there technical issues that may require help from the service provider support team to resolve?

Tips!

Uploading Additional Income Documentation

If you need to upload additional income documentation to the service provider, edit your previous request so you are uploading documentation to the service provider's existing application ID. Request an updated Income Calculation Report from the service provider. The service provider will return an updated Income Calculation Report to you with the same report ID.

Updates to the Income Calculation Report

If you need to make manual updates to the Income Calculation Report, follow your service providers process for manually updating an Income Calculation Report. Confirm you are using the same Report ID so LPA can access the updated Income Calculation Report.

Step 3(a): Complete Loan Product Advisor Loan Data Entry

Once you have reviewed the Income Calculation Report and made any applicable adjustments, submit the loan with the stable monthly income amount and complete loan data entry in your loan origination system. Keep the following requirements in mind when entering data:

- Select the applicable service provider:
 - Use the following enumeration to Unique ID 431.80 –
lpa:RequestedDocumentVendorIdentifier, as applicable:
 - ➔ “HLCN”: Halcyon
 - ➔ “CRLC”: CoreLogic
 - ➔ “LNBM”: LoanLogics
 - ➔ “LCFT”: LoanCraft
- Include the report ID assigned by the service provider in the **Report ID** field with the submission for LPA to assess the report.
- “Yes” **must be selected** for the **Self-Employed** indicator field in the Borrower Employment and Income section if the borrower is self-employed, and the amount of self-employed income you used to underwrite the loan entered in the Monthly Income (or Loss) field.
- You may enter income types for a borrower in LPA even if the income is from income types other than eligible self-employed income which is not currently assessed under the automated income assessment with LPA using tax data capability (for example, employed income).

Step 3(b): Submit the Loan to Loan Product Advisor

From your system, submit the loan to LPA. LPA sends a request with the report ID to the service provider. The service provider must match the information provided in the request to release the report data to LPA.

If a match is not made, (for example, an invalid report ID or invalid report) messages are returned indicating LPA was unable to process the report for an individual borrower.

Step 4: Review the Loan Product Advisor Feedback Certificate

LPA provides the Income Representation and Warranty Relief result in the *Assessment Summary* section and applicable messaging in the *Employment and Income* section of the Feedback Certificate.

Review the messages and reconcile them against the information in the Income Calculation Report. Also, verify that the report date and time on the Income Calculation Report matches the report date and time in the LPA message(s). Keep in mind, after you review the messages and determine what, if any action is needed, you may choose to resubmit the loan.

If, for any reason, you update the Income Calculation Report, or provide additional income documentation, you must upload the updated report and/or income documentation to the service provider and resubmit the loan with the same report ID to LPA.

Note: On resubmissions, maintain the same report ID in the **Report ID** field.

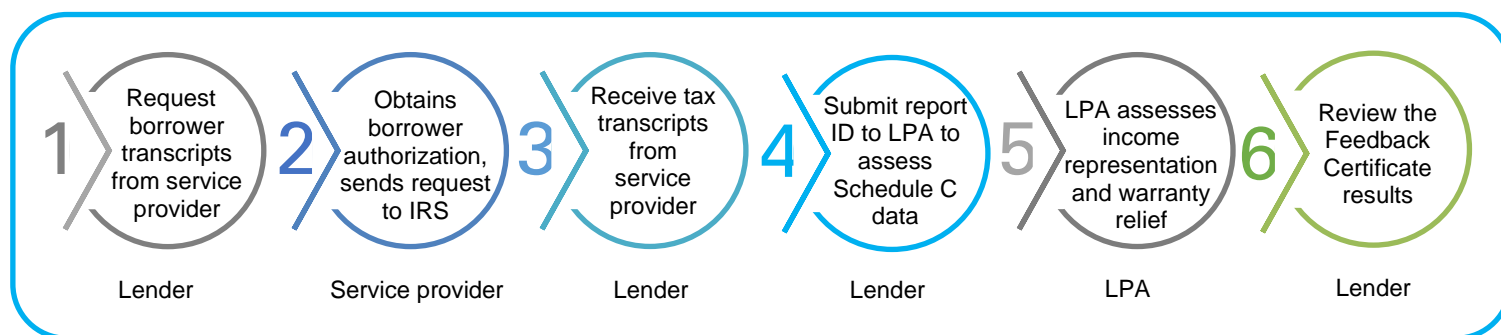

Steps for Originating Loans: Using Tax Transcripts from a Service Provider Using a Direct Connection to the IRS

Operational, Loan Origination System (LOS), and service provider system impacts must be taken into consideration before implementing this capability. Once you are ready to begin using this service follow and complete the steps outlined below. Based on your organization's business processes, the order in which you complete the steps may vary.

Obtaining tax transcripts from a service provider* process steps

How it Works:

*Halcyon is currently the only service provider supporting this capability.

Step 1: Request borrower tax transcripts

Request the borrower's tax transcripts from a service provider.

Step 2: Initiate Requests

The service provider initiates the authorization for IRS tax transcripts with the borrower. The borrower authorizes the request, and the service provider submits a tax transcript request through a direct connection to the IRS.

Step 3: Receive tax transcripts

Once you receive the tax transcripts, review the information and document the calculation of the borrower's self-employed income on Form 91 or a similar alternative form as described in Section 5304.1.

Step 4: Complete Loan Product Advisor Loan Data Entry

Submit the loan to LPA with the stable monthly income amount and complete loan data entry in your loan origination system.

Keep the following requirements in mind when entering data:

- Select the service provider
 - ➡ Use the following enumeration to Unique ID 431.80 –
lpa:RequestedDocumentVendorIdentifier: “HLCN”: Halcyon
- Include the report ID assigned by the service provider in the **Report ID** field with the submission for LPA to assess Schedule C tax transcript data. Refer to “Importance of the Report ID”.
- “Yes” **must be selected** for the **Self-Employed** indicator field.

Step 5: LPA Assess Income Representation and Warranty Relief Eligibility

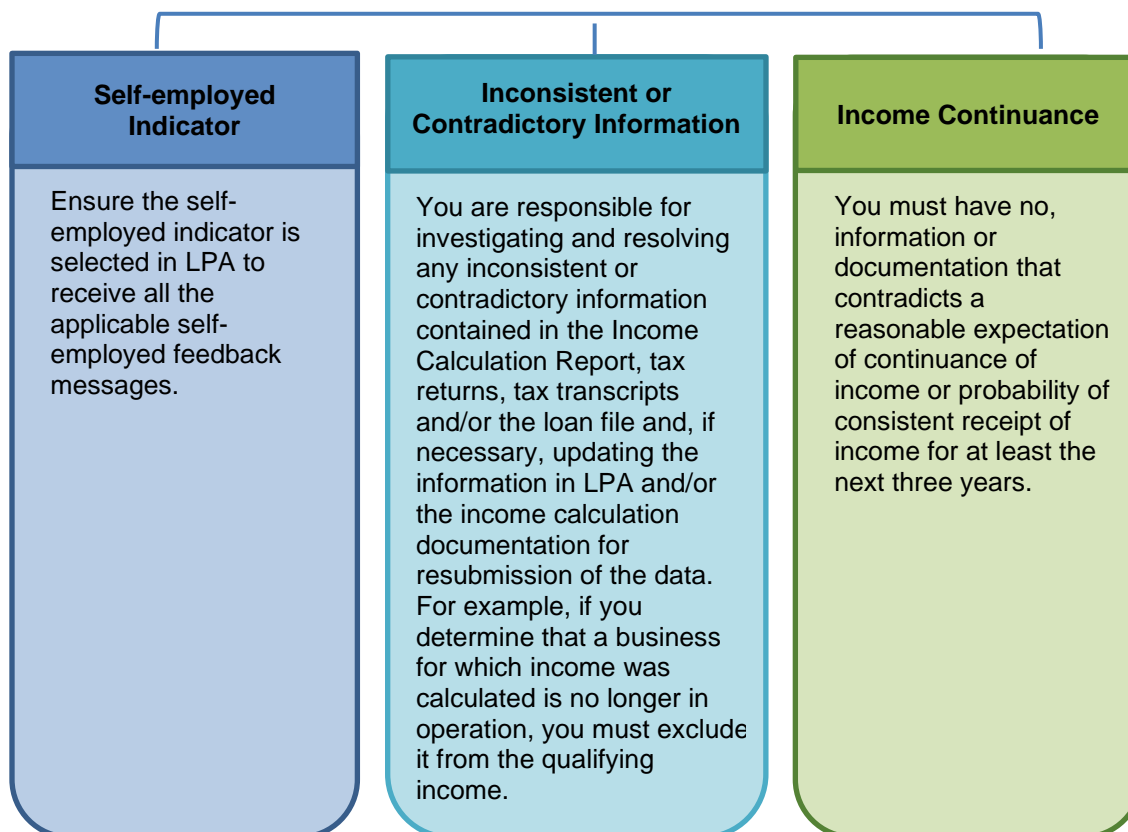

If LPA is able to assess the income, you may be eligible for relief of representations and warranties related to the accuracy and integrity of the tax transcript data.

Step 6: Review the Loan Product Advisor Feedback Certificate

LPA provides the Income Representation and Warranty Relief result in the *Assessment Summary* section and applicable messaging in the *Employment and Income* section of the Feedback Certificate. Review the messages returned.

Note: On resubmissions, maintain the same **report ID**.

Important Reminders

Ineligible Income Types for LPA Assessment

All income used to qualify the borrower must meet the requirements of the Guide. Income not included under this capability for LPA assessment may be used to qualify the borrower, provided the income meets Guide requirements. For instance, the following income types may be shown on the tax returns but are not included under the AIM for income using tax data capability for LPA assessment; however, these income types may still be used to qualify the borrower for the loan:

- Wages, Salaries, Tips, etc.
- Dividends
- Capital Gains
- IRA distributions
- Rental income (IRS Form 8825)*
- Social Security
- Corporation income
- Taxable and non-taxable interest
- Alimony
- Royalties
- Other gains/losses
- Pensions/annuities
- Unemployment Compensation
- Other income
- Farm income

*For rental income assessment reported on Schedule E (IRS Form 1040) refer to the [AIM Enhancement – Rental Income Assessment](#) job aid. **Reminder:** Rental income is not eligible for income representation and warranty relief assessment.

Seller's In-House Quality Control Program

For mortgages selected for Seller's in-house pre-closing and/or post-closing quality control review that receive an income rep and warranty relief message on the Last Feedback Certificate of either "Eligible" for loan-level or "Eligible" for partial income representation and warranty relief with a feedback message indicating that no further documentation is required for the eligible self-employed income reflected on the Income Calculation Report, Form 91 or similar form, you are not required to do the following

- Recalculate income for eligible self-employed income described in Section 5304.2 that is on the Income Calculation Report, Form 91 or alternative form, and
- Perform the business and income analysis described in Section 5304.1(d) for eligible self-employed income that is on the Income Calculation Report, Form 91 or alternative form.

For mortgages that receive an "Eligible" for **tax transcript data** representation and warranty relief message on the last Feedback Certificate, the Seller is not responsible for the accuracy and integrity of the data from tax transcripts obtained from the service provider for Schedule C income (as described in Section 5304.2(e)(iii)).

For mortgages that receive an "Eligible" for **tax return data** representation and warranty relief message on the last Feedback Certificate, the Seller is not responsible for the accuracy and integrity of the tax data for eligible income described in Section 5304.2(e)(iii)) that is on the Income Calculation Report.

If IRS income information was received during the origination process, then Form 4506-C is not required.
