January 2026 Release Notes

The January 22, 2026, Quality Control Advisor Plus release includes the following enhancements to improve the user experience:

1. **Contacts Self-Serve Capability** – Saves you time by allowing you to maintain your own Contacts without the need to contact Freddie Mac to make those updates.
   - You can only have one of each Contact Type (Highest Authority (required), Loan File Request (not required), and Missing Docs (not required)).
   - If you need to send an email to multiple individuals for a given role, you should use the "Additional Email(s)" field. You can add any number of email addresses (Cc) separated by comma(s).

2. **Notifications Tab** – A new read only view within your loan file delivers greater clarity around communications related to specific loans by showing every email notification that Freddie Mac sends – and who it was sent to – for a particular loan. Loan-level notifications are shown within a loan record.
