

## Uniform Collateral Data Portal Reference Series for the Lender Admin: 2 - Managing Business Units

This reference is the second in a series of five references for the Lender Administrator, a Uniform Collateral Data Portal® (UCDP®) user who has authority to set up and manage the business structure within the portal, including the access privileges of other users. This user is known as the lender admin. The focus of this reference is on managing business units. Business units contain lender users, Fannie Mae and Freddie Mac Seller Numbers, lender agent relationships, subordinate business units, and aggregator setup. The other references in this series include:

- [Series 1: Lender Admin Registration](#)
- [Series 3: Managing Users](#)
- [Series 4: Managing Lender Agents](#)
- [Series 5: Managing Aggregator Profile](#)

The topics covered in this reference include:

- [Assigning and Removing Seller Numbers](#)
- [Creating a Child Business Unit](#)
- [Renaming a Business Unit](#)
- [Deleting a Business Unit](#)
- [Finding Additional Assistance](#)

**Managing Business Units Overview**

Your organization is initially set up with one business unit in the UCDP based on the information provided during the registration process. This is the primary, or parent, business unit. A business unit contains lender users, Fannie Mae and Freddie Mac Seller Numbers, lender agent relationships, subordinate business units, and aggregator setup.

Once you have access to the portal, you must complete the initial setup of your business unit by assigning at least one Seller Number for each GSE, as applicable. You may not submit an appraisal data file to the portal until you assign at least one Seller Number to the parent business unit.

**For most organizations, the primary business unit meets business needs.** In the event your organization requires additional business units to meet your business process needs, the lender admin may add additional units, known as child business units. With child business units, you can further structure the amount of access other users have within the UCDP. For example, if your organizational structure has several branches or segments, you can optionally set up a similar structure in the UCDP and assign users to certain business units.

You can assign users to only one business unit at a time. Individual users can only see their assigned business unit and cannot see other business units in your organizational structure. A lender admin at the primary business unit level, however, has access to all business units. A lender admin in a child business unit has access to that business unit and all child business units.

The functionality associated with a business unit includes:

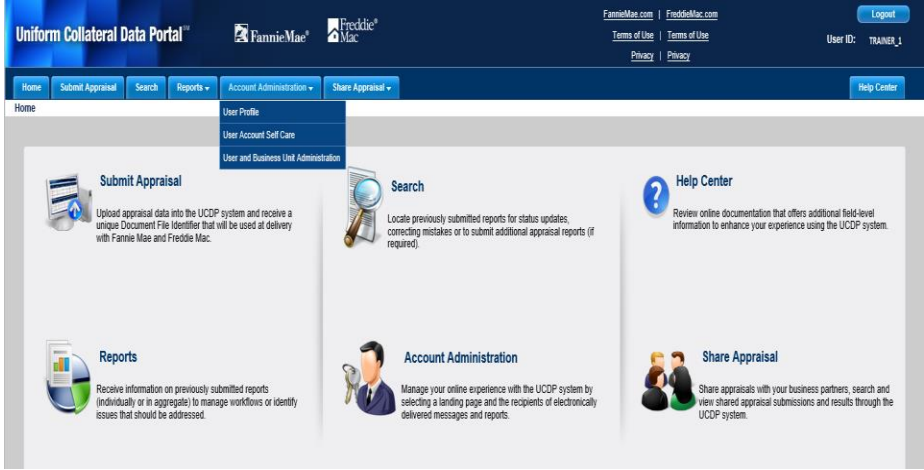

Functionality	Description
<a href="#">Assigning and Removing Seller Numbers</a>	Enables you to assign or remove Seller Numbers to/from a business unit.
<a href="#">Creating a Child Business Unit</a>	Enables you to add another business unit in the UCDP where you can assign Seller Numbers.
<a href="#">Renaming a Business Unit</a>	Enables you to rename a business unit to make organizing business units easier and meet current needs.
<a href="#">Deleting a Business Unit</a>	Enables you to delete a business unit if it does not contain any submissions.

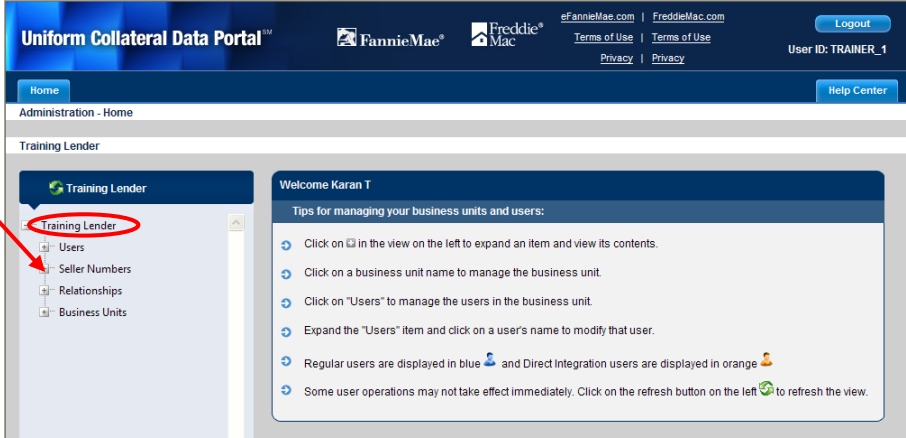

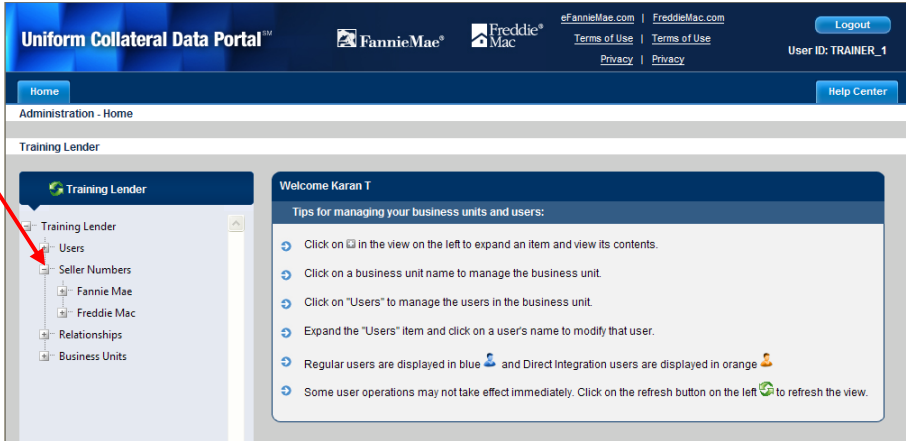

**Assigning and Removing Seller Numbers**

Your organization’s Seller Number(s) for each GSE is automatically entered into the UCDP as part of the initial setup process. For Fannie Mae, the Seller Number is your Seller/Servicer Number or Non-Seller/Servicer Number ID. For Freddie Mac, the Seller Number is your Seller/Servicer Number or Third Party Originator (TPO) Number. You must assign the Seller Number(s) to the parent and any child business unit(s). A Seller Number must accompany all appraisal data files submitted through a particular business unit for each GSE to whom the appraisal file is submitted.

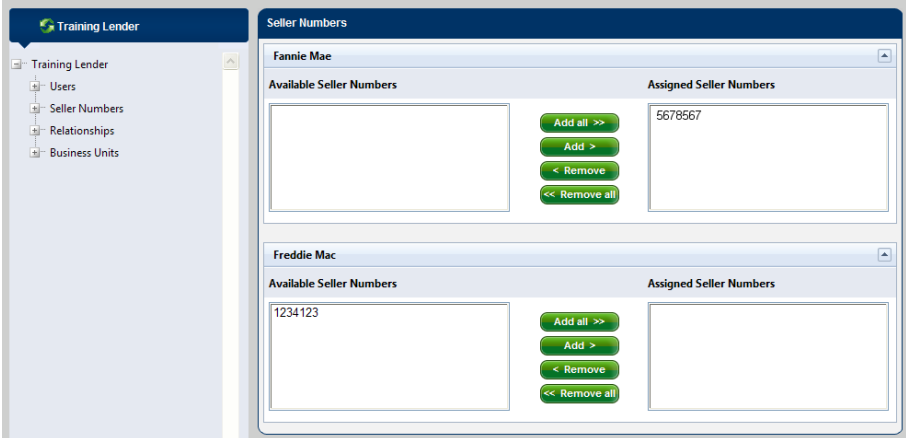

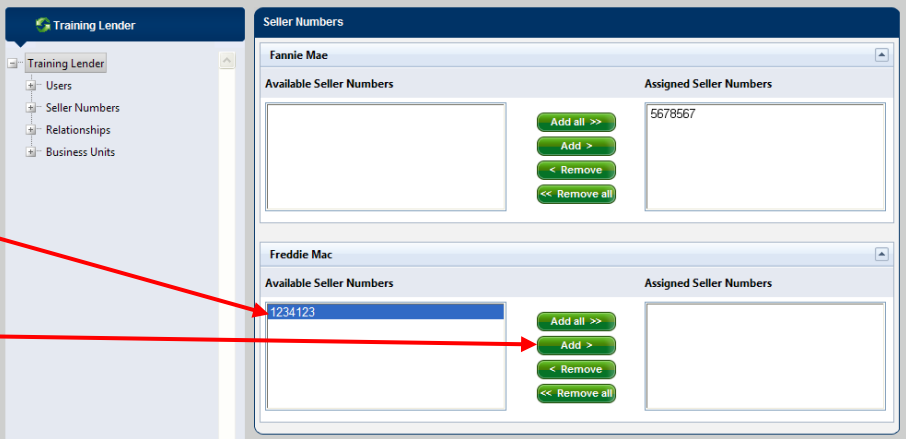

Most organizations typically transact business under one Seller Number for each GSE. If your organization uses more than one Seller Number for a single GSE, you can assign (add) or remove Seller Numbers to/from a business unit. This section focuses on assigning and removing Seller Numbers(s) for a particular business unit.

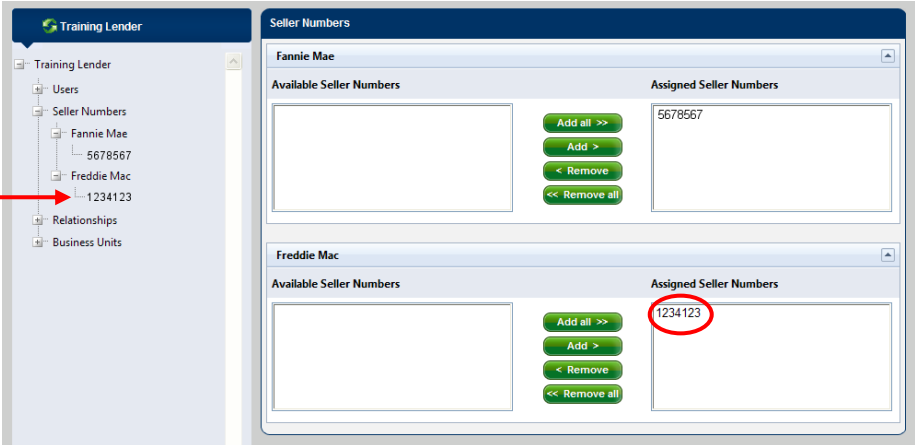

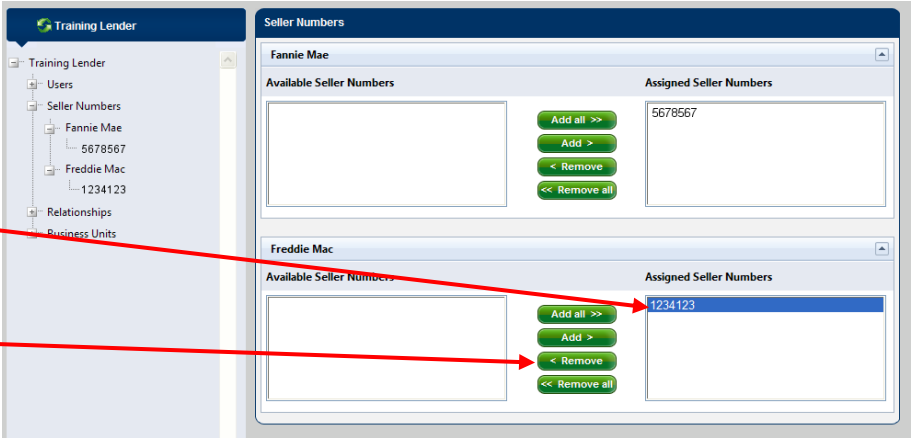

To assign and remove Seller Numbers, follow these steps:

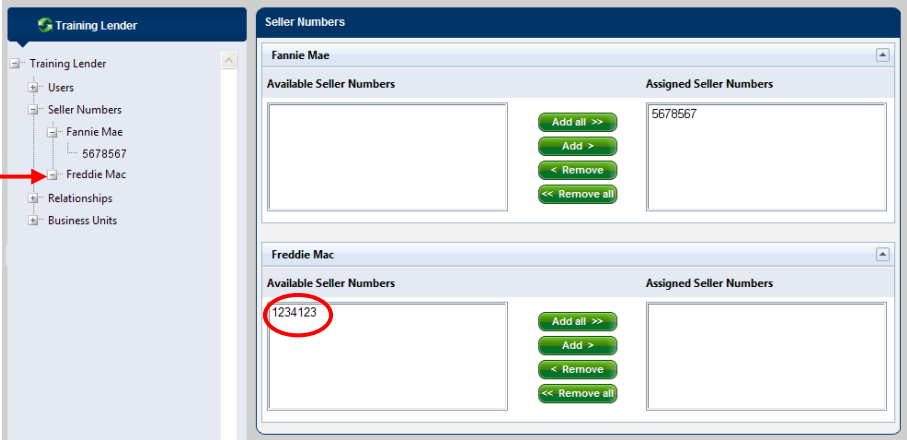

Assigning and Removing Seller Numbers

	<p>The Assigned Seller Numbers list now shows that the Seller Number is removed. It reappears in the Available Seller Numbers list. By opening or refreshing the left navigation, you can also see the Seller Number(s) removed from the GSE.</p>  <p>The screenshot displays the 'Seller Numbers' management interface. On the left, a navigation tree under 'Training Lender' shows 'Seller Numbers' expanded, with 'Freddie Mac' selected. A red arrow points from this selection to the main content area. The main area shows two sections: 'Fannie Mae' and 'Freddie Mac'. In the 'Fannie Mae' section, the 'Assigned Seller Numbers' list contains '5678567', while the 'Available Seller Numbers' list is empty. In the 'Freddie Mac' section, the 'Available Seller Numbers' list contains '1234123' (circled in red), and the 'Assigned Seller Numbers' list is empty. Buttons for 'Add all &gt;&gt;', 'Add &gt;', '&lt; Remove', and '&lt;&lt; Remove all' are visible between the lists in both sections.</p>

## Creating a Child Business Unit

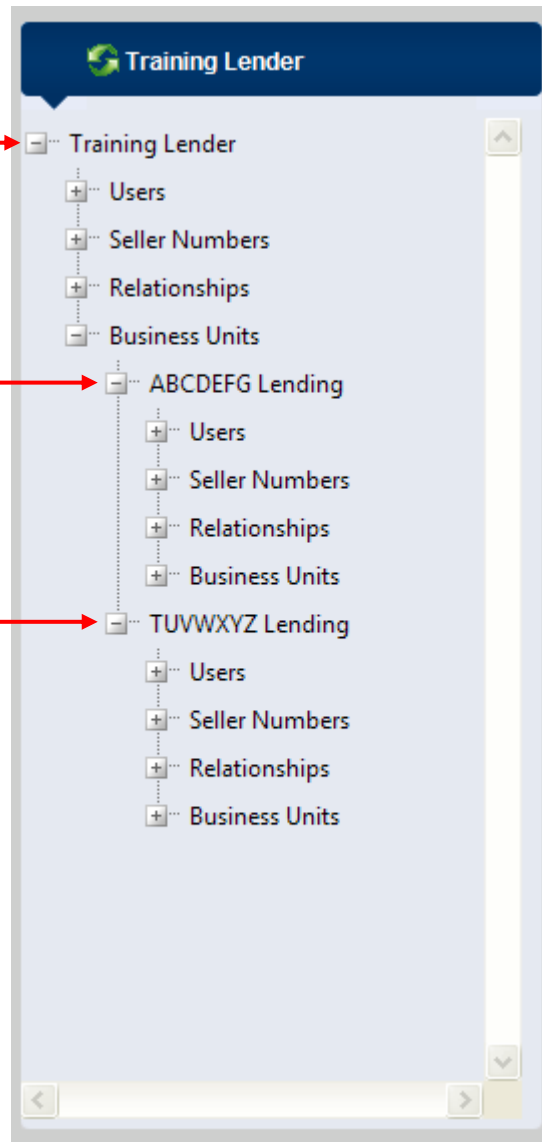

You may create additional business units to accommodate your organizational structure and changing business needs. Each created child business unit contains the same components as the parent business unit including: Users, Seller Numbers, Relationships and Business Units.

In this example, Training Lender is the parent business unit. The two child business units underneath Training Lender are ABCDEFG Lending and TUVWXYZ Lending. You can add more business units anywhere within this structure.

## Deleting a Business Unit

Deleting a business unit is another way to help manage your business units. **Only business units that have never had submissions associated with them can be deleted.** The existence of submissions in a business unit prevents the deletion of that business unit, and you cannot transfer appraisal submissions from one business unit to another. In addition, you cannot delete a business unit if an aggregator profile is already created under the business unit.

Prior to deleting a business unit, all seller numbers need to be unassigned, all users transferred or deleted, and all relationships cancelled. You cannot delete a parent business unit.

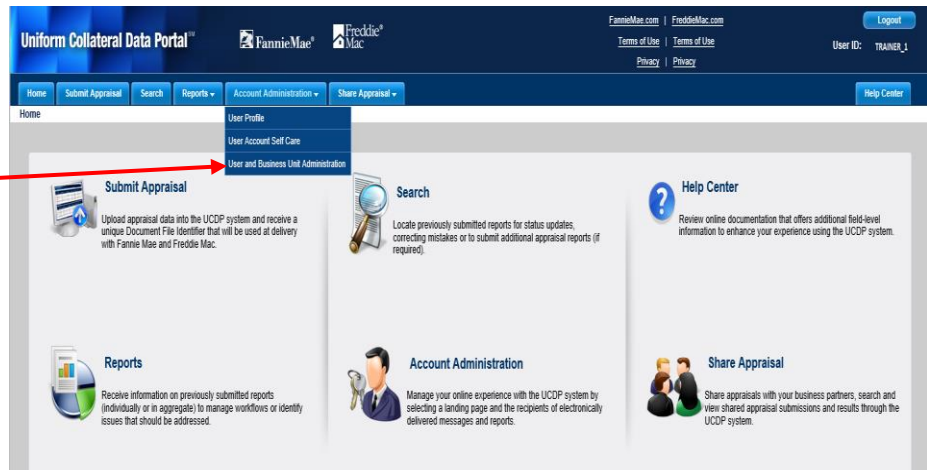

To delete a business unit, follow these steps:

### Deleting a Business Unit

#### Step

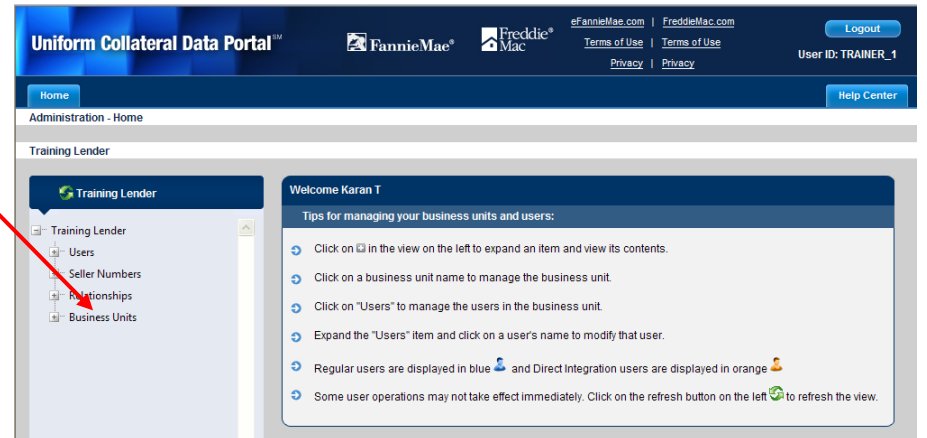

#### Action / Result

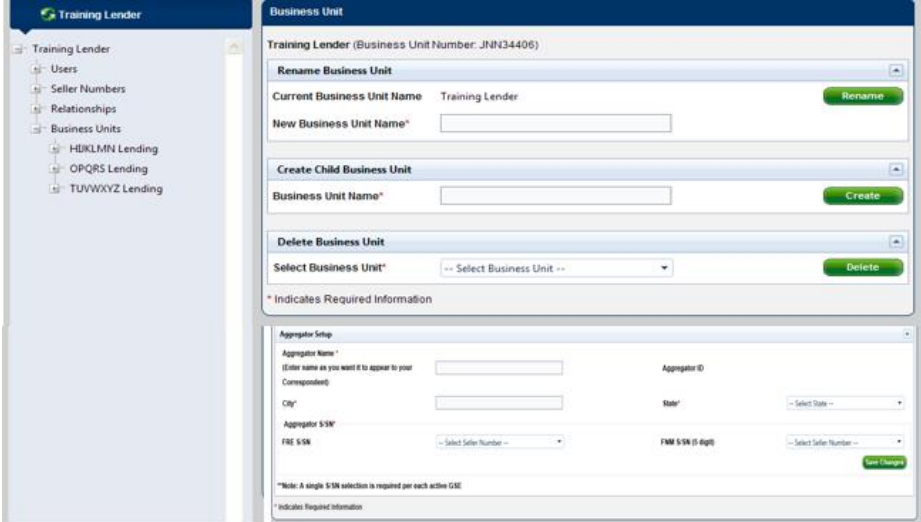

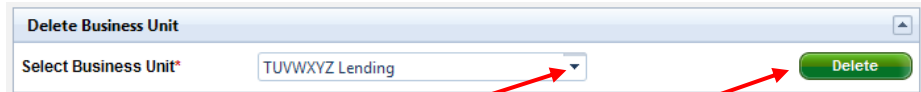

- From the UCDP *Home* page, click the **Account Administration** tab and select **User and Business Unit Administration**.

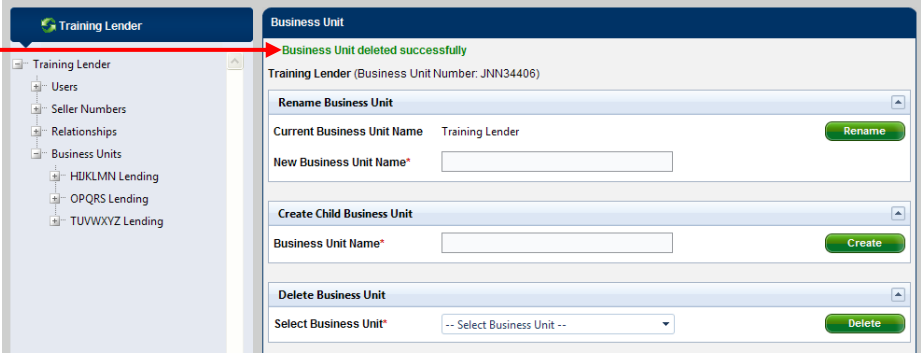

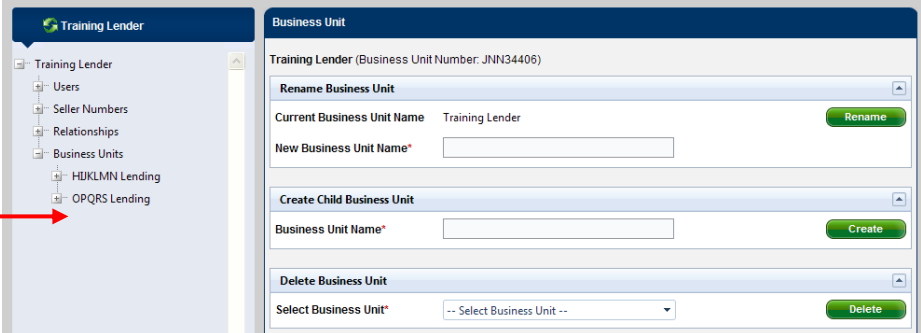

After you select **User and Business Unit Administration**, the **Administration - Home** page appears.

- From the **Administration - Home** page, click **Business Units** in the left navigation bar. Click on the **+** to display the list of existing child business units.

Deleting a Business Unit
